## The cook 3d cooking game download

FIRST of all, I would like to say that I played games with ads. I played games with a lot of ads. I played games with A LOT OF FREAKING ADS. But this game... I mean, I spend maybe 30% of my time in the game playing, and the remaining 70% watching ads. Then. I mean, I don't want to have to turn on airplane mode every time I play the game so there are no ads. Also, it's just not worth it. The game is pretty annoying in itself, but I think if the developers really tried it, they could make this game really fun. At first, it's like, Cool! Wow! I'm cooking a dish! And after a while, it's like, Oh. Cool. I make the same food I did as five hundred times ...! Anyway, I think this game has potential, but I only played for about five minutes and I'm deleting it. No, not because I think it's boring, even if it can be. Because I can't even play! The game is too clogged with ads. This is probably the longest review I've ever written, so I'll close it. But. I mean one last thing. Notice how I gave it a rating of two stars and not a rating of a star? That's because I think the game could really be fun without ads (or at least with fewer ads, I guess, because the ads are how developers make money, and I understand that. Still. IT'S TOO MUCH). Well, sorry for such a long review. Good bye!
