How much does ikea kitchen cost uk

Ikea's kitchen range includes modern, traditional and shaker styles in a range of colours and finishes, including gloss and matt. Most Ikea kitchens are more contemporary than traditional, with many in white or wood effect. Ikea says its Metod kitchen 'gives you complete freedom to personalise your kitchen layout, style and functionality, whatever your size of room or budget'. The Enhet kitchens offer a 'more flexible solution', Ikea says, and is designed to be disassembled and reassembled when you move. Our survey of more than 3,000 who bought a new kitchen in the past 10 years, and our lab assessment of Ikea's kitchens, will help you decide whether an Ikea kitchen is right for you. Ikea Bodbyn dark green kitchen Which? members can log in to reveal Ikea's ratings, according to our lab assessment and its customers. If you're not yet a Which? member, you can join Which? to see all our fitted kitchen reviews. See the Best and worst kitchen brands page to see how Ikea compares with other kitchen brands. Ikea kitchens: units Two Ikea kitchens - Enhet and Metod - were assessed by our lab. These base units can be combined with a range of doors, finishes and colours to create the kitchen you want. Log in now to reveal the results in this table and all the information on the page. Ratings are overall and encompass a number of different assessments. Find out how we test kitchen units. Ikea kitchens: customer survey ratings We spoke to more than 200 people who have bought Ikea kitchens to reveal how its customer service and kitchens compare with other brands. Log in to see what Ikea customers think of its kitchens and the process of buying a kitchen from Ikea. Ikea kitchens: doors, worktops and drawers We also asked Ikea customers to rate the how well different components of the kitchen lasted, as well as quality of worktops and doors they chose. Visit our kitchen units, doors and worktops page to find out about the quality of different materials for doors, worktops and units, and what would work best in your kitchen. Ikea Stensund beige kitchen Ikea kitchens: installation Ikea says its kitchens are designed to be installed by you, and its new Enhet range is fitted together using just your hands, by clicking parts into place. Ikea also has a kitchen installation service or you can choose your own installer to fit your Ikea kitchen. Use Which? Trusted Traders to find a kitchen fitter near you. When we sent the kitchens to the lab, they were built and installed as part of our assessment. Our lab analysis reveals insider knowledge on how easy Ikea's units are to install. Log in or join Which? to see what Ikea's customers had to say about the service and insight from our kitchen assessment. Ikea kitchens: costs and services How much does an Ikea kitchen cost? Log in to discover the price of a mid-range Ikea kitchen when we went undercover to visit each brand to ask for a specific kitchen layout in summer 2017. Then check our guide to new kitchen costs to see how much you should expect to spend on a new kitchen, depending on how big it is and whether you're looking for standard or top-of-the-range fittings. Does Ikea have a kitchen planner/design service? There is a free kitchen-planning service in store. During your two-hour appointment, you'll work with an Ikea kitchen specialist to create your dream kitchen, it says. You can have your planning appointment over video call instead. The planner will share their screen so you can see your kitchen design take shape. You'll need to measure your space before your appointment but, if you're ready, you can order your kitchen as part of your appointment. Ikea also offers free online kitchen-planning software. Does Ikea install kitchens? Ikea offers an optional fitting service at extra cost. It's not carried out by Ikea installers but is organised by Ikea. All Ikea units come ready to self-assemble and Ikea says they're designed to be installed by you. If you'd prefer a professional to fit your kitchen, use Which? Trusted Traders to find a kitchen installer near you. Does Ikea sell kitchen appliances, flooring and tiles? It sells large kitchen appliances from a couple of brands, fitted at extra cost. Ikea doesn't supply kitchen flooring or tiles. Say you're redoing your kitchen and you don't have lottery winnings to give you an unlimited budget. Cabinets tend to be the costliest item in a renovation, but you'd like to have a little money left over for other niceties like a new fridge or a cool backsplash. Where do you turn? Chances are, you've probably heard about Ikea cabinets from one of its cult followers. People who have Ikea kitchens tend to love them. What's the big deal and why do they show up everywhere? I wondered the same thing as I started planning a remodel of my own 1890 kitchen that lacked any cabinet system whatsoever. Reeling from sticker shock at big-box and cabinet-shop prices, but apprehensive about flat-packed DIY cabinets from the Swedish giant, I went down an Ikea cabinet rabbit hole and am here to share some key takeaways you should know before you take the leap. First things first. There's a huge sale periodically and it's going on right now (it ends Sunday, July 29). The Ikea Kitchen Event is a straightforward 15 percent credit on a purchase of \$2,000 and up in the form of an Ikea gift card to be used on a future purchase. If you don't buy your cabinets during a sale and then — oh no! — the sale launches shortly after? It's worth contacting the store. Several Ikea fans I heard from said they bought just before the sale and the store made good on the special offer. The bad news? Everybody else wants an Ikea kitchen right about now, so I hear it's a bit of a zoo. You'll need an extra dose of patience. Ikea cabinets come ready to assemble (also known as RTA) in "flat-packed" boxes. They're "frameless," meaning you make use of all the space inside the cabinet, and are designed to hang on a rail system, with adjustable plastic feet on the base so they don't sit directly on the floor. They're constructed of particleboard wrapped in melamine (pros and cons of that vs. wood are an entire other story). An intrepid and budget-minded DIYer can do everything from design to pick-up to assembly to installation — or hire out everything to Ikea and their partners or a whole cottage industry of people ready to help every step of the way. Megan Winfield, an IT manager in the hospitality industry in Lexington, Kentucky, and her husband outfitted a 1930s kitchen a few years ago. "We went to big box stores such as Lowe's and Home Depot and the prices for semi-custom cabinetry was mind boggling," she says. For a kitchen with two walls of cabinets (upper and lower), they spent "in the neighborhood of \$5,000. We paid about \$1,200 for installation and backsplash and mounting of countertops onto cabinetry. We had estimates from local stores ranging from \$7,000 to \$12,000 for cabinets with installation, but in many cases that was for what we believed was an inferior quality product." Likewise Kim Sorise, a teacher in Louisville, Kentucky, also spent about \$5,000 for her Ikea cabinets. Seven years later, it's going strong. While remodelers can use the Ikea planning system online, "usually people call me because they have attempted to get into the Ikea software and realize what an incredible time suck it is," Lindsay Grote of The Design Couple in Denver told NBC News BETTER. "You're taking time to learn software. For people who are savvy in architecture it's intuitive, but even if you know the software inside and out like I do there's a ton of time because the software freezes or you lose things — sometimes it takes 10 minutes to move a cabinet." An Ikea spokesperson acknowledged the issue. "We've definitely heard that complaint," says Kathleen Wilber, Ikea's senior sales leader for kitchens in the U.S., "and within the next year we're going to be launching a system that's much more friendly. I'm so excited about this. The finished drawing will look like a photo." And especially helpful for anyone new to kitchen design or feeling overwhelmed: "The user will answer five questions and based on answers the system will provide five starter plans." "An Ikea kitchen can look really bad or really good," Grote, who has designed 170 kitchens, says. "It is worth your time to hire a designer. There are so many aspects of kitchen design to make sure it functions well." A number of designers like Grote specialize in designing Ikea kitchens, and of course there's help available at the store itself. "Come to the store, we've got planning stations to get on there and we can coach you," says Wilber. "You can make an appointment, [co-workers] can make the plan for you ... If you're efficient and have all your decisions made you should have a plan in the two hours." (Check your local store website for email contact information to make the appointment.) While Ikea has a limited number of cabinet fronts available — "we offer about 18-20 options from modern to traditional styles," Wilber says — several companies offer fronts designed just for Ikea frames. Especially for clients with higher-end houses, "I advocate they use custom cabinet fronts like Semihandmade, which I personally love," said Grote. "The quality is really, really nice and you have the option to DIY where you pick your Benjamin Moore paint." Of course there's an up-charge for this of at least 20 percent, maybe 30 to 40 percent over Ikea prices, she said. And you're not locked into Ikea hardware — I picked up some vintage brass cabinet pulls for my cabinets early in my planning stages. Check out blogger Stace King's post I Promise These are Ikea Kitchens and get ready to overload your Pinterest. "It's not like building an Ikea Billy bookcase," Wilber says. "There are many steps to consider when installing a kitchen. Even assembling the cabinets should not be taken lightly. If just one of them isn't assembled correctly and is not 'square' it could cause a gap that will only be exaggerated as the other cabinets get installed along the run. Also, not all walls are flat or plumb. This could lead to a bad installation if you don't know how to take the steps to shim or level correctly." "Most of our customers hire someone to install their kitchen," she adds. That bumps up the cost of course; Ikea's installation partner averages a cost of \$2,600. But confident DIYers have tackled the job successfully. Michelle Bingham, a graphic designer in San Ramon, California, and her husband have done Ikea kitchens in their last two homes. "Ikea instructions are a bit lacking in info, pieces aren't labeled and sometimes the illustrations aren't that helpful," she says. "You really have to work within the Ikea sizes and it is tricky trying to figure out what can fit and where it can fit, we even retrofitted items to finish off things nicely." When they did their second kitchen, "we knew what we were in for and felt comfortable assembling everything ourselves. "Want a step by step? Abby Lawson of Just a Girl and Her Blog" break down the entire process in this great post: "How to Design and Install Ikea SEKTION Kitchen Cabinets." If you go pick everything up, do you have the people power you'll need? Sorise rented a U-Haul and took reinforcements — two friends to help. "You have to load your own [stuff] but they pull everything for you from the stacks and meet you outside," she says. "They're flat packed so they're [the weight of] several dead bodies and you have to have a place to put them all when you get home." We'll leave you with a last few choice bits of wisdom from Wilber: The most important part is having accurate measurements of the space and that's not as easy as you'd think it would be. Be aware that an order can be upwards of 200 articles being delivered. We do ask that the customer do a complete inventory while the driver is there. You can charge it! The new Ikea Projekt credit card lets you make equal payments over 60 months for purchases over \$5,000. Want more tips like these?
